Subject: Pall FSI Product Discontinuation

Dear Valued Customer:

Pall Corporation’s goal is to provide a range of high-performance, differentiated filtration and separation solutions and services. To continue to deliver the high-level of support and expertise you expect, we will focus our filtration product range to solutions that drive the most value to help customers solve some of their most complex and critical challenges. With this new focus, all FSI® products will stop being manufactured on December 31, 2020.

Affected products include the following:

	Product Family	Product Type
Affected Pall FSI Products	Felt Filter Bags	PONG, PENG, PEEX, POEX, BHT, POLYFOLD, MAXPONG
	Microfiber Filter Bags	POMF
	Seamless Bags	BOS, BOSG, BOSMAX
	Mesh Filter Bags	NMO, PEM, PMO
	Cartridges	VOREX (CMMF), VOREX HP (CMHP), CLEARPLEAT
	Bag and Cartridge Filter Housings	FSPN, FSMC, CBFP, SBF, FMC
	Plastic Filter Housings	X100, XL234
	Others	Accessories, Spare Parts, FerrX Systems

Through December 31, 2020, we will focus production on fulfilling current confirmed and acknowledged orders. Any new orders will be subject to inventory availability.

We value your business and relationship and understand the impact this discontinuation may have on your operations. Your local sales representative and our technical support team are available to respond to your questions and can direct you to potential alternate suppliers to help with sourcing alternate products elsewhere.

With this change Pall will be better positioned to solve your toughest filtration and separation challenges. Thank you for your understanding in this matter.

Regards,

Todd Barrett
 Vice President and General Manager, Fluid Technologies and Asset Protection
 Pall Corporation
